#### Complete Example Answer

**Question:** School students should not be allowed to use their smartphones in schools. Do you agree or disagree? Give reasons for your response.

**It is my view that** students should not be allowed to use smartphones in schools for a couple of reasons. **Firstly**, these phones should be restricted as they can be highly distracting for students. **For instance**, games and social media notifications can divert students' attention away from their lessons, thereby hindering their learning. **Another point to consider is** that smartphones can facilitate cheating during exams, which is a major issue for teachers. **Admittedly**, if used correctly, smartphones have the ability to enhance learning through educational apps and websites. **In conclusion**, despite the potential educational benefits, it would be wise for schools to restrict smartphone use.
